Abhishek Dubey is an Associate Professor of Computer Science, Electrical Engineering and Computer Engineering at Vanderbilt University. He is currently serving as a Program Director at the National Science Foundation, where he oversees the Cyber-Physical Systems, Smart & Connected Communities, and Civic Innovation Challenge portfolios. His research spans both foundational advances—in resilience, robustness, and explainability of AI for cyber-physical systems—and translational impact, with operational deployments in mobility, energy, and public safety through partnerships with CARTA, WeGo, Nissan, Nashville Fire Department, Siemens, and other stakeholders. As director of the SCOPE Lab, he has led several federally and industry-funded projects in these areas totaling approximately \$24.0 million as PI and has additionally contributed to approximately \$45.1 million as Co-PI. A NSF Career award recipient, his scholarship includes 253 peer-reviewed publications with an h-index of 39 and 5668 citations as of Sep 22, 2025. He is also a co-founder and chief science officer of Mobius AI.

Awards and Honors

- 2025 Vanderbilt University School of Engineering, Community Impact Research Award
- 2025 Best Paper Finalist, International Conference on Autonomous Agents and Multiagent Systems (AAMAS 2025), for paper *Reinforcement Learning-based Approach for Vehicle-to-Building Charging with Heterogeneous Agents and Long Term Rewards*
- 2025 Best Paper Finalist, IEEE International Conference on Smart Computing (SMARTCOMP 2025), for paper *TRACE: Traffic Response Anomaly Capture Engine for Localization of Traffic Incidents*
- 2025 Award for Outstanding Systems or Deployments, Institute for Software Integrated Systems (ISIS), for the microtransit system design and pilot in Chattanooga, TN
- 2024–2026 Chancellor Faculty Fellow, Vanderbilt University
- 2024 Best Paper Award, ACM/IEEE International Conference on Cyber-Physical Systems (ICCPS 2024), for paper *An Online Approach to Solving Public Transit Stationing and Dispatch Problem*
- 2024 Best Paper Award, Equity in Transportation Track, INFORMS Annual Meeting 2024, for paper *Designing Equitable Transit Networks*
- 2024 General Chair, ACM/IEEE International Conference on Cyber-Physical Systems (ICCPS 2024)
- 2024 Best Deployment Award, Institute for Software Integrated Systems (ISIS), for demonstration paper *SmartTransit.AI: A Dynamic Paratransit and Microtransit Application*
- 2023–2025 Google Cloud Research Champion Innovator

- 2023 Founder, Mobius AI, Inc., Catalyst Innovation Award
- 2023 Best Demonstration Award, IEEE International Conference on Smart Computing (SMART-COMP 2023), for *Mobility-On-Demand Transportation: A System for Microtransit and Para-transit Operations*
- 2022 Best Paper Award, AI for Social Good Track, International Joint Conference on Artificial Intelligence (IJCAI 2022), for paper *ADVISED: AI-Driven Vaccination Intervention Optimiser for Increasing Vaccine Uptake in Nigeria*
- 2022 Best Paper Candidate, ACM/IEEE International Conference on Cyber-Physical Systems (IC-CPS 2022), for paper *Anomaly based Incident Detection in Large Scale Smart Transportation Systems*
- 2022 High-Value Research Recognition, AASHTO Research Advisory Committee for *Crash Predictive Analytics Program with Tennessee Department of Transportation (TDOT)*
- 2022 NSF CAREER Award, for project *Robust Online Decision Procedures for Societal-Scale Cyber-Physical Systems*
- 2019 Best Paper Award, IEEE International Conference on Smart Computing (SMARTCOMP 2019), for paper *Mechanisms for Integrated Feature Normalization and Remaining Useful Life Estimation Using LSTMs Applied to Hard-Disks*
- 2019 Arab American Frontiers Symposium, invited by the U.S. National Academy of Engineering
- 2019 Invited Participant, Shonan Seminar on the Future of Work in Power Systems
- 2017 Recognition for Technology Committee Leadership, Connected Nashville and Nashville Technology Council (NTC)
- 2017 Finalist, Nashville Technology Council Awards, for project *Transit Hub*
- 2016 Letter of Commendation, Chancellor's Office, Vanderbilt University, for Smart Cities work in Nashville
- 2015 Promotion to Senior Member, Institute of Electrical and Electronics Engineers (IEEE)
- 2012 Best Paper Award, International Conference on Autonomic and Autonomous Systems (ICAS 2012), for paper *A Deliberative Reasoner for Model-Based Software Health Management*

Leadership Roles and Fellowship

- 2025– **Steering Committee Member**, ACM/IEEE International Conference on Cyber-Physical Systems (ICCPS).
- 2024– **Program Director**, National Science Foundation, Directorate for Computer and Information Science and Engineering (CISE), Cyber-Physical Systems, Smart and Connected Communities, and Civic Innovation Challenge.
- 2024–2026 **Chancellor Faculty Fellow**, Vanderbilt University.
- 2024– **Co-founder and Chief Science Officer**, Mobius AI, Inc.
- 2024– **Energy Integration Co-lead**, Vanderbilt Center for Sustainability, Energy and Climate.
- 2024– **Member**, Vanderbilt Connected Computing College Committee.
- 2024 **Co-lead, Research Committee**, Vanderbilt Center for Sustainability, Energy and Climate.
- 2024– **Affiliated Faculty**, NSA Center of Academic Excellence in Cyber Research, Vanderbilt University.
- 2023–2024 **Director of Graduate Studies**, Computer Science (M.S. program).
- 2023 **General Co-chair**, IEEE International Conference on Smart Computing (SMARTCOMP 2023).

- 2023 **Program Co-chair**, ACM/IEEE International Conference on Cyber-Physical Systems (IC-CPS 2023).
- 2023 **Program Co-chair**, International Conference on Assured Autonomy (ICAA 2023).
- 2022–2024 **Expert**, National Science Foundation, Smart and Connected Communities and Cyber-Physical Systems Program.
- 2022– **Director**, SmartTransit.ai Research Group.
- 2020 **Finance Chair**, IEEE International Symposium on Real-Time Computing (ISORC 2020).
- 2019 **General Chair**, IEEE International Symposium on Real-Time Computing (ISORC 2019).
- 2017 **Co-chair**, Connected Nashville Technology Committee.
- 2016– **Director**, ScopeLab.ai Laboratory.
- 2016– **Senior Member**, Institute of Electrical and Electronics Engineers (IEEE).

Academic Appointments

- 2025– **Associate Professor**, Computer Science (College of Connected Computing) and Electrical and Computer Engineering (School of Engineering), Vanderbilt University.
- 2022– **Associate Professor**, Computer Science, Electrical Engineering and Computer Engineering, Department of Electrical Engineering and Computer Science, Vanderbilt University.
- 2016– **Senior Research Scientist**, Institute for Software Integrated Systems, Vanderbilt University.
- 2016–2022 **Assistant Professor**, Computer Science and Computer Engineering, Department of Electrical Engineering and Computer Science, Vanderbilt University.
- 2014–2016 **Adjunct Assistant Professor**, Computer Science and Computer Engineering, Department of Electrical Engineering and Computer Science, Vanderbilt University.
- 2009–2016 **Research Scientist**, Institute for Software Integrated Systems, Vanderbilt University.

Industry Appointments

- 2024– **Co-founder and Chief Science Officer**, Mobius AI, Inc.
- 2008 **Research Intern**, IBM T.J. Watson Research Center, Hawthorne, NY.
- 2006 **Research Intern**, General Motors, Technical Center, Warren, MI.
- 2001–2003 **Software Engineer**, IBM Global Services, India.

Education

- 2009 **Ph.D., Electrical Engineering**, Vanderbilt University, Nashville, TN
 - *Dissertation*: Using Model-Based Techniques for Improving Performance and Reliability in High-Performance Scientific Computing.
 - *Advisor*: Prof. Gabor Karsai, Department of Electrical Engineering and Computer Science.
 - *Committee*: Prof. Gabor Karsai (Chair), Prof. Theodore Bapty, Prof. Paul Sheldon, Prof. Sherif Abdelwahed, Prof. Sandeep Neema.
- 2005 **M.S., Electrical Engineering**, Vanderbilt University, Nashville, TN
 - *Thesis*: Metamodel-Based Language and Computation Platform for Algorithmic Analysis of Hybrid Systems.
 - *Advisor*: Dr. John Koo (ASTRI). *Second Advisor*: Prof. Gabor Karsai.

2001 **B.Tech. (Honors), Electrical Engineering**, Indian Institute of Technology, Banaras Hindu University, Varanasi, India

Transition to Practice

2023- Founded Mobius AI, Inc providing enterprise level fleet management solutions utilizing non-myopic planning, autonomy-aware routing, and vehicle-to-grid optimization

Patents

- 2024 Aron Laszka, Ayan Mukhopadhyay and Abhishek Dubey. Dynamic Vehicle Routing Problem With Prompt And Guaranteed Confirmation Of Advance Requests. Applied for Provisional Patent 2024.
- 2024 N. M. Baig, L. Pedersen, X. Yang, A. Baranskaya, L. Atkins, K. Wray, A. Dubey, G. Pettet, A. Mukhopadhyay, J. P. Talusan, and others, Electric vehicle charging control device, US Patent App. 18/309,772. Oct-2024.
- 2023 A. Dubey, M. Wilbur, A. Mukhopadhyay, and A. Laszka, Forecasting energy consumption in a mixed-vehicle fleet, US Patent App. 18/708,438.

Software

- OPTIMUS – Discrete event simulator for vehicle-to-building charging optimization.
- ARINC-653-Emulator – First open-source operating system implementation for Future Airborne Capability Environment (FACE) on Linux.
- SolidWorx – Modular platform for integrating blockchain and cyber-physical systems.
- CHARIOT – Reconfiguration engine for cyber-physical system software.
- ReSonAte – Runtime risk assessment framework for autonomous systems.
- TRANSAX – Middleware for transactive energy systems.
- Smart Transit – Software-as-a-service cloud platform for transit agencies focusing on energy and schedule optimization.
- Statresp – Software-as-a-service cloud platform for state departments of transportation and city emergency departments focusing on resource allocation, optimization, and dispatch.
- Schoolride.ai – School bus disruption management software.
- Vectura – Online approach to solving public transit stationing and dispatch problem.
- Resilient Information Architecture Platform for Smart Grid (RIAPS) – Now a Linux Foundation project.
- MODICUM – Online market software for enabling computational outsourcing.
- F6MDK – Containerized operating system for fractionated satellites.

Sponsored Research Support

Current Metrics	Total Projects: 58. Proposals Selected for Funding as PI: 38, Proposals Selected for Funding as co-PI: 20. Total Award Dollars as PI: \$24.0 million (Vanderbilt allocation: \$10.9 million). Additionally, collaborated as Co-PI in total awards of size \$45.1 million.
At Tenure	Total Projects: 39. Proposals Selected for Funding as PI: 22, Proposals Selected for Funding as co-PI: 17. Total Award Dollars as PI: \$8.3 million (Vanderbilt allocation: \$4.9 million). Additionally, collaborated as Co-PI in total awards of size \$27.6 million.

Proposals Selected but Awaiting Funds

- 2024–2028 U.S. Department of Transportation (USDOT). **PATH-TN: Partnership for AI-driven Multimodal Transportation Services Integration in Tennessee Cities (contract Pending)**. Abhishek Dubey (PI), Ayan Mukhopadhyay and Jose Paolo Talusan. \$2,000,000. Total \$8,666,053. **Prime:** Vanderbilt University. Collaborating Institutions: WeGo, Penn State, University of Tennessee at Chattanooga, University of Memphis, Chattanooga Area Regional Transportation Authority, Memphis Area Transit Authority, Knoxville Area Transit, University of Tennessee at Knoxville and Vanderbilt University.

Federal and State Sponsored Research as PI

- 2025–2026 U.S. Department of Transportation (USDOT). **Fixed-Line Transit 2.0: Real-Time Optimization of High-Frequency Transit Services (contract Pending)**. Abhishek Dubey (PI), Ayan Mukhopadhyay and Jose Paolo Talusan. \$466,000. Total \$466,000. **Prime:** WeGo. Collaborating Institutions: WeGo, Penn State and Vanderbilt University.
- 2024–2027 U.S. Department of Energy (DOE). **AI-Powered Autonomy-Aware Neighborhood Mobility Zones**. Abhishek Dubey (PI) and Ayan Mukhopadhyay. \$600,000. Total \$3,294,294. **Prime:** Chattanooga Area Regional Transportation Authority (CARTA). Collaborating Institutions: Vanderbilt University (Tech Lead), CARTA, Cornell University, Penn State, Spark the Firm, Nissan.
- 2024–2026 Tennessee Department of Transportation (TDOT). **Influencing Mode Shift Through Behavioral Change Strategies – Phase II**. Abhishek Dubey. \$29,915. Total \$100,000. **Prime:** University of Memphis. Collaborating Institutions: Vanderbilt University and University of Memphis.
- 2024–2025 Tennessee Department of Economic and Community Development. **Designing Multimodal Transit for Blue Oval City and Volkswagen**. Abhishek Dubey, Meiyi Ma, Ayan Mukhopadhyay, David Rogers. \$190,000. Total \$500,000. **Prime:** University of Memphis. Collaborating Institutions: University of Tennessee at Chattanooga, University of Memphis, University of Tennessee at Knoxville and Vanderbilt University.
- 2024–2025 Tennessee Department of Economic and Community Development. **AI-Driven Route Generation and Alert Notification System for School Districts**. Abhishek Dubey (PI), Meiyi Ma, Ayan Mukhopadhyay and David Rogers. \$450,000.
- 2023–2025 National Science Foundation (NSF). **NSF Engines: Tennessee Technology-Enabled Advanced Mobility Engine**. Abhishek Dubey (PI). \$50,000. Total \$50,000. **Prime:** University of Tennessee at Knoxville. Collaborating Institutions: UTK, UTC, UM and Vanderbilt University.
- 2023–2028 National Science Foundation (NSF). **CAREER Award: Robust Online Decision Procedures for Societal Scale CPS**. Abhishek Dubey (PI). \$499,270.
- 2022–2024 National Science Foundation (NSF). **SCC-IRG Track 1: Mobility for all - Harnessing Emerging Transit Solutions for Underserved Communities - REU**. Abhishek Dubey (PI) and Ayan Mukhopadhyay. \$32,000.
- 2022–2025 Tennessee Department of Transportation (TDOT). **AI-Engine for Adaptive Sensor Fusion For Traffic**. Abhishek Dubey (PI). \$208,268.

- 2020–2024 U.S. Department of Energy (DOE). **AI-Engine for Optimizing Integrated Service Mixed Fleet Transit Operations**. Abhishek Dubey (PI). \$477,000. Total \$2,306,858. **Prime:** Chattanooga Area Regional Transportation Authority. Collaborating Institutions: Vanderbilt University (Tech Lead), Cornell University, Penn State, University of Tennessee at Chattanooga, Chattanooga Area Regional Transportation Authority, Siemens, Pacific Northwest National Laboratory.
- 2020–2025 National Science Foundation (NSF). **SCC-IRG Track 1: Mobility for all - Harnessing Emerging Transit Solutions for Underserved Communities**. Abhishek Dubey (PI) , Paul Speer and Ayan Mukhopadhyay. \$1,200,000. Total \$2,134,898. **Prime:** Vanderbilt University. Collaborating Institutions: Cornell University, Penn State, University of Tennessee at Chattanooga, Chattanooga Area Regional Transportation Authority, Vanderbilt University and University of Washington.
- 2021–2024 Federal Transit Administration (FTA). **SAFE-Ride – A Regional Transit Coalition for Managing Safe and Efficient Transit Operations using AI**. Abhishek Dubey (PI) and Ayan Mukhopadhyay. \$216,794. Total \$120,000. **Prime:** WeGo. Collaborating Institutions: Vanderbilt University (Tech Lead), The Transit App, Penn State and WeGo.
- 2020–2021 National Science Foundation (NSF). **Collaborative Research: RAPID: Addressing Transit Accessibility and Public Health Challenges due to COVID-19**. Abhishek Dubey. \$54,912. Total \$99,998. **Collaborative Grant:** University of Houston and Vanderbilt University
- 2018–2021 U.S. Department of Energy (DOE). **High-dimensional Data-driven Energy Optimization for Multi-Modal Transit Agencies (HD-EMMA)**. Abhishek Dubey (PI). \$355,110. Total \$1,000,000. **Prime:** Chattanooga Area Regional Transportation Authority. Collaborating Institutions: Vanderbilt University (Tech Lead), University of Houston and Chattanooga Area Regional Transportation Authority.
- 2018–2021 National Science Foundation (NSF). **III: Small: Collaborative Research: Summarizing Heterogeneous Crowdsourced & Web Streams Using Uncertain Concept Graphs**. Abhishek Dubey (PI) and Gautam Biswas. \$239,953. Total \$499,654. **Collaborative Grant:** Vanderbilt University and George Mason
- 2018–2021 National Science Foundation (NSF). **NeTS: JUNO2: Collaborative Research: STEAM: Secure and Trustworthy Framework for Integrated Energy and Mobility in Smart Connected Communities**. Abhishek Dubey (PI). \$209,992. Total \$449,988. **Collaborative Grant:** Missouri University of Science and Technology, Waseda University, Nara Institute of Technology and Vanderbilt University
- 2017–2019 Marriott International. **Internet of Things (IoT) Immersion**. Abhishek Dubey (PI) and Aniruddha Gokhale. \$29,999.
- 2016–2020 National Science Foundation (NSF). **USIgnite: Collaborative Research: Social Computing Platform for Multi-Modal Transit**. Abhishek Dubey (PI). \$306,376. Total \$600,000. **Collaborative Grant:** Vanderbilt University and University of Washington
- 2015–2017 National Science Foundation (NSF). **CPS-EAGER- Experiments with Smart City Hubs: Integration Platform for Human Cyber-Physical Systems In Smart Cities**. Abhishek Dubey (PI), Sandeep Neema and Jules White. \$197,556.
- 2012–2013 Office of Naval Research (ONR). **Domain Specific Languages for Designing Electrical Ships**. Abhishek Dubey (PI). \$40,580.
- 2010–2012 National Science Foundation (NSF). **Center for Autonomic Computing**. Abhishek Dubey (PI). \$49,970.

Industry Sponsored Research as PI

- 2025–2026 Siemens. **AI Driven Software Evolution**. Abhishek Dubey (PI) and Ajay Chokra and Jules White. \$200,000.
- 2022–2025 Nissan. **Optimizing Vehicle Charging and Discharging for Reducing Building Grid Dependency**. Abhishek Dubey (PI) and Ayan Mukhopadhyay. \$634,736.
- 2021–2022 Cisco Systems. **EdgeNet- An online Edge Computing Based Generative Anomaly Detection and Prognostics Solution for Networked Equipment at Customer Premises**. Abhishek Dubey (PI), Aniruddha Gokhale and Ayan Mukhopadhyay. \$100,000.
- 2023–2025 Cisco Systems. **Integrated Software Environment for Online Edge Computing Based Generative Anomaly Detection**. Abhishek Dubey (PI), Jose Paolo Talusan and Ayan Mukhopadhyay. \$100,000.
- 2019–2020 Cisco Systems. **Spatio-Temporal AI Inference Engines for System-Level Reliability**. Abhishek Dubey (PI) and Aniruddha Gokhale. \$100,000.
- 2017–2019 Siemens, Inc. **Blockchain as Middleware Services for Transactive Energy Applications**. Abhishek Dubey (PI). \$478,375.
- 2017–2018 MetaMorph. **MetaMorph Draper**. Abhishek Dubey (PI). \$84,201.
- 2017–2018 MetaMorph. **CAD Extensions for OpenMETA**. Abhishek Dubey (PI). \$88,127.
- 2016–2019 Siemens, Inc. **Industry Affiliate Program Grant**. Abhishek Dubey (PI). \$450,000.
- 2016–2017 Siemens, Inc. **City-scale Extensible Smart Cyber-Physical Systems**. Abhishek Dubey (PI). \$49,886.
- 2014–2016 Siemens, Inc. **Building Resilient Distributed Systems for Next-Generation Mobile Adhoc Cyber-Physical Systems**. Abhishek Dubey (PI). \$238,188.

Vanderbilt University Sponsored Research as PI

- 2025–2027 Vanderbilt Center for Sustainability, Energy and Climate. **Co-Optimization of Mixed-Mode Electric Vehicle (EV) Fleets for Energy Stability and Extreme Events**. Abhishek Dubey (PI), Jose Paolo Talusan and Ayan Mukhopadhyay . \$299,341.
- 2025–2026 Vanderbilt University. **Nashville Innovation Alliance: Predictive Analytics for Fire Department Staffing and Resource Optimization**. Abhishek Dubey (PI), Jose Paolo Talusan and Ayan Mukhopadhyay . \$59,998.
- 2024–2026 Vanderbilt University. **Chancellor Faculty Fellowship**. Abhishek Dubey (PI). \$80,000.
- 2024–2025 Vanderbilt University. **Mobius, Inc: Last mile Freight Optimization for Heterogeneous Fleets**. Abhishek Dubey (PI), David Rogers, Jose Paolo Talusan and Ayan Mukhopadhyay . \$80,000.

Federal and State Research Grants as Co-PI

- 2023–2027 Defense Advanced Research Projects Agency (DARPA). **Assured Neuro Symbolic Components and Systems (ANSCS)**. PI: Gabor Karsai. \$5,672,990
- 2022–2025 Tennessee Department of Transportation (TDOT). **TDOT RDS Data Quality Assurance and High-Resolution Content Enhancement**. PI: William Barbour. \$249,030
- 2022–2025 Advanced Research Projects Agency–Energy (ARPA-E). **Microgrid Control/Coordination Co-Design (MicroC3)**. PI: Gabor Karsai. \$1,999,670

- 2020–2023 U.S. Department of Defense (DoD). **Integrated Microgrid Control Platform**. PI: Karsai, Gabor. \$933,392
- 2020–2023 Defense Advanced Research Projects Agency (DARPA). **Model-based Intent-Driven Adaptive Software (MIDAS)**. PI: Karsai, Gabor. \$3,176,697
- 2019–2025 National Science Foundation (NSF). **Collaborative Research: An Interdisciplinary Approach to Prepare Undergraduates for Data Science Using Real-World Data from High-Frequency Monitoring Systems**. PI: Biswas, Gautam. \$631,435
- 2018–2025 National Science Foundation (NSF). **FW-HTF Theme 1: Collaborative Research: Augmenting and Advancing Cognitive Performance of Control Room Operators for Power Grid Resiliency**. PI: Biswas, Gautam. \$323,081
- 2018–2026 Defense Advanced Research Projects Agency (DARPA). **Assurance-based Learning-enabled Cyber-Physical Systems (ALC)**. PI: Karsai, Gabor. \$9,265,386
- 2018–2022 Defense Advanced Research Projects Agency (DARPA). **Assurance-based Learning-enabled Cyber-Physical Systems (ALC)**. PI: Karsai, Gabor. \$7,196,463
- 2018–2020 Tennessee Department of Transportation (TDOT). **Collaborative Research Project To Coordinate The Data From the Crash Predictive Analytics Program Between TDOT and TDOSHS**. PI: Baroud, Hiba. \$174,998
- 2018–2019 General Dynamics Land Systems. **GDLS-MBSE**. PI: Bapty, Ted. \$120,000
- 2016–2020 U.S. Department of Energy (DOE). **Resilient Information Architecture Platform for the Smart Grid (RIAPS)**. PI: Karsai, Gabor. \$3,998,459
- 2016–2019 National Science Foundation (NSF). **Integrated Safety Incident Forecasting and Analysis**. PI: Yevgeniy Vorobeychik. \$199,993
- 2016–2017 Air Force Office of Scientific Research (AFOSR). **SCOPE Laboratory: Experimental Testbed for Evaluating Secure Cyber Operations in Physical Environments**. PI: Gokhale, Aniruddha. \$95,400
- 2014–2016 Defense Advanced Research Projects Agency (DARPA). **Support for System of Systems Integration Technology and Experimentation (SoSITE)**. PI: Karsai, Gabor. \$96,146
- 2013–2016 National Science Foundation (NSF). **CPS: Synergy: Collaborative Research: Diagnostics and Prognostics Using Temporal Causal Models for Cyber-Physical Systems- A case of Smart Electric Grid**. PI: Karsai, Gabor. \$399,951
- 2012–2014 Air Force Research Laboratory (AFRL). **Resilient Software Systems**. PI: Karsai, Gabor. \$699,570
- 2012–2013 U.S. Department of Defense (DoD). **Future Airborne Capability Environment (FACE 5)**. PI: Bapty, Ted. \$3,573,021
- 2011–2014 Defense Advanced Research Projects Agency (DARPA). **DARPA - F6 Model-driven Development Kit (F6MDK)**. PI: Karsai, Gabor. \$6,245,040

Publications

Current Metrics	Refereed Publications: 253, Journals: 51, Highly Selective Peer Reviewed Conferences (Acceptance Rate < 33%): 63, h-index: 39, i10-Index: 124, Total Citations: 5668
At Tenure	Refereed Publications: 172, Journals: 33, Highly Selective Peer Reviewed Conferences (Acceptance Rate < 33%): 19, h-index: 27, i10-Index: 59, Total Citations: 2564
Select Publication Awards	Finalist (AAMAS 2025), Best Paper (ICCPs 2024), Best Deployment (local) (IJCAI 2024), Best Paper Runner Up (local) (AAMAS 2024), Best Paper (Equity Track) (Informs 2024), Best Paper (IJCAI 2022), Candidate (ICCPs 2022), Best Paper (Smartcomp 2019), Best Paper (ICAS 2012)

- Following Publication lists include trailing marks to denote key author categories
- Co-authors with a trailing * indicate graduate and undergraduate students.
- Co-authors with a trailing § indicate collaborating faculty.
- Co-authors with a trailing † indicate students who have graduated and are still collaborating.
- Co-authors with a trailing ‡ are postdocs, research scientists or senior research scientists.

Journals

2025

- J1. Agnivesh Pani[§], Harish Puppala, Shreepati Jha, Ankit Gupta^{*}, Ayan Mukhopadhyay[‡], and **Abhishek Dubey**. 2025. “Enhancing Urban Mobility with Aerial Ropeway Transit (ART): Future Accessibility Impacts of Multimodal Transit Expansion Scenarios”. *Transportation Research Record*, 2679, 2, 2144–2161
- *Summary*: This paper describes the impacts of a potential ropeway transit system being designed in varanasi, india.
 - *Contributions*: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper. [Impact Factor: 1.6.]
- J2. Jose Paolo Talusan[‡], Chaeun Han^{*}, David Rogers[‡], Ayan Mukhopadhyay[‡], Aron Laszka[§], Dan Freudberg, and **Abhishek Dubey**. July 2025. “An End-to-End Solution for Public Transit Stationing and Dispatch Problem”. *ACM Trans. Cyber-Phys. Syst.*, (July 2025). Just Accepted
- *Summary*: This paper extends the best paper winner from ICCPS 2024 and shows the generalization of approach across larger datasets.
 - *Contributions*: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper. [Impact Factor: 2.9.]

2024

- J3. Md. Jaminur Islam^{*}, Jose Paolo Talusan[‡], Shameek Bhattacharjee[§], Francis Tiausas^{*}, **Abhishek Dubey**, Keiichi Yasumoto[§], and Sajal K. Das[§]. May 2024. “Scalable Pythagorean Mean-based Incident Detection in Smart Transportation Systems”. *ACM Trans. Cyber-Phys. Syst.*, 8, 2, (May 2024)
- *Summary*: Algorithms for detecting traffic anomalies. We propose an incremental region growing approximation algorithm for optimal Spatio-temporal clustering of road segments and their data; such that road segments are strategically divided into highly correlated clusters
 - *Contributions*: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper. [Impact Factor: 2.3.]
- J4. Yasas Senarath^{*}, Ayan Mukhopadhyay[‡], Hemant Purohit[§], and **Abhishek Dubey**. Mar. 2024. “Designing a Human-centered AI Tool for Proactive Incident Detection Using Crowdsourced Data Sources to Support Emergency Response”. *Digit. Gov.: Res. Pract.*, 5, 1, (Mar. 2024)
- *Summary*: This paper describes a tool for early incident detection on highways using information from Waze.
 - *Contributions*: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper. [Impact Factor: 1.595.]

- J5. Salah Uddin Kadir^{*}, Subir Majumder, Anurag K. Srivastava[§], Ajay Dev Chhokra[†], Himan-shu Neema[§], **Abhishek Dubey**, and Aron Laszka[§]. 2024. “[Reinforcement-Learning-Based Proactive Control for Enabling Power Grid Resilience to Wildfire](#)”. *IEEE Transactions on Industrial Informatics*, 20, 1, 795–805
- *Summary*: This paper describes an approach to handle uncertainty while responding to grid failures caused by wildfires.
 - *Contributions*: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper. [Impact Factor: 11.7.]

2023

- J6. Michael Wilbur^{*}, Afiya Ayman^{*}, Amutheezan Sivagnanam^{*}, Anna Ouyang^{*}, Vincent Poon^{*}, Riyan Kabir, Abhiram Vadali, Philip Pugliese, Daniel Freudberg, Aron Laszka[§], and **Abhishek Dubey**. 2023. “[Impact of COVID-19 on Public Transit Accessibility and Ridership](#)”. *Transportation Research Record*, 2677, 4, 531–546
- *Summary*: This paper provided analysis of impact of covid-19 on public transportation services.
 - *Contributions*: 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper. [Impact Factor: 1.6.]
- J7. Francis Tiausas^{*}, Keiichi Yasumoto[§], Jose Paolo Talusan[†], Hayato Yamana[§], Hirozumi Yamaguchi[§], Shameek Bhattacharjee[§], **Abhishek Dubey**, and Sajal K. Das[§]. Oct. 2023. “[HPRoP: Hierarchical Privacy-Preserving Route Planning for Smart Cities](#)”. *ACM Trans. Cyber-Phys. Syst.*, 7, 4, (Oct. 2023)
- *Summary*: This paper describes an innovative privacy preserving routing algorithm for smart transportation.
 - *Contributions*: 10%. Collaboratively developed the research ideas as a mentor to the team of students and edited a portion of the paper. [Impact Factor: 2.3.]

2022

- J8. Ayan Mukhopadhyay[†], Geoffrey Pettet[†], Sayyed Mohsen Vazirizade[†], Di Lu, Alejandro Jaimes, Said El Said, Hiba Baroud[§], Yevgeniy Vorobeychik[§], Mykel Kochenderfer[§], and **Abhishek Dubey**. 2022. “[A Review of Incident Prediction, Resource Allocation, and Dispatch Models for Emergency Management](#)”. *Accident Analysis & Prevention*, 165, 106501
- *Summary*: This is one of the first exhaustive reviews of decision-theoretic prediction and optimization procedures used in emergency response domain.
 - *Contributions*: 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper. [Impact Factor: 5.7.]
- J9. Alessandro Coglio, Eric McCarthy, Stephen Westfold, Daniel Balasubramanian, **Abhishek Dubey**, and Gabor Karsai[§]. May 2022. “[Syntheto: A Surface Language for APT and ACL2](#)”. *Electronic Proceedings in Theoretical Computer Science*, 359, (May 2022), 151–167
- *Summary*: This paper describes a high-level language for ACL2.
 - *Contributions*: 10%. Collaboratively developed the research ideas as a mentor to the team of students and edited a portion of the paper.
- J10. Bradley Potteiger, **Abhishek Dubey**, Feiyang Cai, Xenofon Koutsoukos[§], and Zhenkai Zhang^{*}. 2022. “[Moving target defense for the security and resilience of mixed time and event triggered cyber–physical systems](#)”. *Journal of Systems Architecture*, 125, 102420
- *Summary*: This paper describes the design of a moving target defense algorithm using an operating system kernel that supports spatial and temporal separation.

- *Contributions: 10%. Collaboratively developed the research ideas as a mentor to the team of students and edited a portion of the paper. [Impact Factor: 3.8.]*

- *Summary:* This paper describes the design of Deep NN Car and describes an online simplex strategy for adaptive augmentation of a preexisting AI based driving algorithms in the vehicles.
 - *Contributions:* 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper. [Impact Factor: 3.8.]
- J27. Saqib Hasan^{*}, **Abhishek Dubey**, Gabor Karsai[§], and Xenofon Koutsoukos[§]. 2020. “A game-theoretic approach for power systems defense against dynamic cyber-attacks”. *International Journal of Electrical Power & Energy Systems*, 115
- *Summary:* This paper describes a game theoretic dynamic strategy for prioritizing the resources that should be protected during dynamic attacks on substation networks.
 - *Contributions:* 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper. [Impact Factor: 5.0.]
- J28. Shashank Shekhar, Ajay Chhokra[†], Hongyang S, Aniruddha Gokhale[§], **Abhishek Dubey**, Xenofon Koutsoukos[§], and Gabor Karsai[§]. 2020. “URMILA: Dynamically Trading-off Fog and Edge Resources for Performance and Mobility-Aware IoT Services”. *Journal of Systems Architecture*
- *Summary:* This paper describes dynamic optimization of fog computing services.

- *Contributions: 10%. Collaboratively developed the research ideas as a mentor to the team of students and edited a portion of the paper. [Impact Factor: 3.8.]*

2019

- J29. Fangzhou Sun^{*}, **Abhishek Dubey**, Jules White[§], and Aniruddha Gokhale[§]. Jan. 2019. “[Transit-hub: a smart public transportation decision support system with multi-timescale analytical services](#)”. *Cluster Computing*, 22, Suppl 1, (Jan. 2019), 2239–2254
- *Summary:* This paper describes the Transit Hub system my team developed for Nashville, TN as part of the global cities team challenge in 2016.
 - *Contributions: 40 %.* *Devised and directed the main research ideas and wrote/edited a significant portion of the paper. [Impact Factor: 3.6.]*
- J30. Ria Mae Borromeo, Lei Chen, **Abhishek Dubey**, Sudeepa Roy, and Saravanan Thirumuganathan. 2019. “[On Benchmarking for Crowdsourcing and Future of Work Platforms](#)”. *IEEE Data Eng. Bull.*, 42, 4, 46–54
- *Summary:* This paper describes the discussions from the benchmark problems from the Shonan meeting on future of work in 2019.
 - *Contributions: 5%.* *Participated in paper discussion.*
- J31. **Abhishek Dubey**, W. Emfinger, A. Gokhale[§], P. Kumar, D. McDermet, T. Bapty[§], and G. Karsai[§]. July 2019. “[Enabling Strong Isolation for Distributed Real-Time Applications in Edge Computing Scenarios](#)”. *IEEE Aerospace and Electronic Systems Magazine*, 34, 7, (July 2019), 32–45
- *Summary:* The paper describes the design and implementation of a FACE conformant operating system kernel that provides both POSIX as well as ARINC653 APIs and support health management.
 - *Contributions: 90%. Primary Author. [Impact Factor: 3.6.]*
- J32. **Abhishek Dubey**, Gabor Karsai[§], Peter Volgyesi[†], Mary Metelko, Istvan Madari, Hao Tu, Yuhua Du, and Srdjan Lukic[§]. 2019. “[Device Access Abstractions for Resilient Information Architecture Platform for Smart Grid](#)”. *Embedded Systems Letters*, 11, 2, 34–37
- *Summary:* The paper describes the design of device actors, an abstraction to integrate heterogeneous external devices into distributed power system applications built over the RIAPS platform.
 - *Contributions: 90%. Primary Author. [Impact Factor: 1.7.]*

2018

- J33. Ajay Chhokra[†], **Abhishek Dubey**, Nagabhushan Mahadevan[§], Gabor Karsai[§], Daniel Balasubramanian, and Saqib Hasan^{*}. Feb. 2018. “[Hierarchical Reasoning about Faults in Cyber-Physical Energy Systems using Temporal Causal Diagrams](#)”. *International Journal of Prognostics and Health Management*, 9, 1, (Feb. 2018)
- *Summary:* This paper describes the design and operations of a new formalism for studying and analyzing temporal fault propagation in power system networks.
 - *Contributions: 25 %.* *Collaboratively developed the research ideas and wrote/edited a portion of the paper. [Impact Factor: 1.4.]*
- J34. Marisol Garcia Valls, **Abhishek Dubey**, and Vicent J. Botti. 2018. “[Introducing the new paradigm of Social Dispersed Computing: Applications, Technologies and Challenges](#)”. *Journal of Systems Architecture*, 91, 83–102

- *Summary:* The paper explores the emerging concepts of computing and how they are beneficial to social cyber-physical system applications. A key contribution of the paper is to present a consensus definition of various emerging distributed system concepts and identify the research challenges.
 - *Contributions:* 50 %. *Jointly developed the idea with Marisol and co-wrote the paper.* [Impact Factor: 3.8.]
- J35. Subhav Pradhan*, **Abhishek Dubey**, Shweta Khare, Saideep Nannapaneni[‡], Aniruddha S. Gokhale[§], Sankaran Mahadevan[§], Douglas C. Schmidt[§], and Martin Lehofer. 2018. “[CHAR-IOT: Goal-Driven Orchestration Middleware for Resilient IoT Systems](#)”. *Transactions of Cyber Physical Systems*, 2, 3, 16:1–16:37
- *Summary:* This paper describes the algorithm, design, and architecture of an online reconfiguration planner that can ensure that cyber-physical systems can recover from failures without a prescribed sequence of recovery actions.
 - *Contributions:* 40 %. *Devised and directed the main research ideas and wrote/edited a significant portion of the paper.* [Impact Factor: 2.3.]

2017

Gokhale[§], Pranav Srinivas Kumar, William Emfinger, and Gabor Karsai[§]. 2015. “DREMS ML: A wide spectrum architecture design language for distributed computing platforms”. *Science of Computer Programming*, 106, 3–29
- *Summary:* This paper describes the modeling language that combines the best aspects of textual and graphical environments to enable design and analysis of applications for fractionated satellite platforms that were part of the DARPA F6 program.
 - *Contributions:* 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper. **[Impact Factor: 1.5.]**
- J42. Nagabhushan Mahadevan[§], **Abhishek Dubey**, Ajay Chhokra[†], Huangcheng Guo, and Gabor Karsai[§]. 2015. “Using temporal causal models to isolate failures in power system protection devices”. *IEEE Instrumentation and Measurement Magazine*, 18, 4, 28–39
- *Summary:* This paper describe the temporal causal model formulation that is an extension of temporal failure propagation graphs and focuses on diagnosing systems with fault protection devices that can fail themselves.
 - *Contributions:* 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper. **[Impact Factor: 1.6.]**
- J43. Tihamer Levendovszky, **Abhishek Dubey**, William Otte, Daniel Balasubramanian, Alessandro Coglio, Sandor Nyako, William Emfinger, Pranav Srinivas Kumar, Aniruddha S. Gokhale[§], and Gabor Karsai[§]. 2014. “Distributed Real-Time Managed Systems: A Model-Driven Distributed Secure Information Architecture Platform for Managed Embedded Systems”. *IEEE Software*, 31, 2, 62–69
- *Summary:* This paper describes the key challenges and the mechanisms to mitigate those challenges for multi stakeholder distributed real-time systems.
 - *Contributions:* 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper. **[Impact Factor: 2.589.]**
- J44. Nagabhushan Mahadevan[§], **Abhishek Dubey**, Daniel Balasubramanian, and Gabor Karsai[§]. 2013. “Deliberative, search-based mitigation strategies for model-based software health management”. *Innovations in Systems and Software Engineering*, 9, 4, 293–318
- *Summary:* This paper described deliberation strategies for finding the optimal mitigation action for recovering real-time systems from failures. This paper was part of our effort on developing health management techniques for software-intensive systems.

- *Contributions: 40 %. Devise and directed the main research ideas and wrote/edited a significant portion of the paper. [Impact Factor: 1.1.]*
- J45. **Abhishek Dubey** and Gabor Karsai[§]. 2013. “[Software health management](#)”. *Innovations in System and Software Engineering*, 9, 4, 217
 - *Summary: introduction to the special issue on software health management.*
 - *Contributions: 40 %. Devise and directed the main research ideas and wrote/edited a significant portion of the paper. [Impact Factor: 1.1.]*
- J46. Subhav Pradhan*, William Otte, **Abhishek Dubey**, Aniruddha S. Gokhale[§], and Gabor Karsai[§]. 2013. “[Towards a resilient deployment and configuration infrastructure for fractionated spacecraft](#)”. *SIGBED Review*, 10, 4, 29–32
 - *Summary: This paper provided an early overview of the System F6 software architecture that included a separation kernel, multi-level security information architecture, and a remote deployment engine that can manage the application state remotely and securely.*
 - *Contributions: 40 %. Devise and directed the main research ideas and wrote/edited a significant portion of the paper.*
- J47. **Abhishek Dubey**, Gabor Karsai[§], and Nagabhushan Mahadevan[§]. 2011. “[A component model for hard real-time systems: CCM with ARINC-653](#)”. *Software: Practice and Experience*, 41, 12, 1517–1550
 - *Summary: This paper described one of the first implementations of an ARINC-653 layer for Linux. It also described the formulation of a component model for building distributed applications upon that operating system.*
 - *Contributions: 90%. Primary Author. [Impact Factor: 2.6.]*
- J48. Steven Nordstrom, **Abhishek Dubey**, Turker Keskinpala, Sandeep Neema[§], and Theodore Bapty[§]. 2011. “[Autonomic Healing of Model-Based Systems](#)”. *JACIC*, 8, 4, 87–99
 - *Summary: This paper described a policy for prescriptive system recovery mechanism for high performance computing clusters.*
 - *Contributions: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper.*
- J49. Luciano Piccoli, **Abhishek Dubey**, James N Simone, and James B Kowalkowski. Apr. 2010. “[LQCD workflow execution framework: Models, provenance and fault-tolerance](#)”. *Journal of Physics: Conference Series*, 219, 7, (Apr. 2010), 072047
 - *Summary: This paper described the workflow engine used for Lattice Quantum Chromodynamics experiments at FERMI Lab.*
 - *Contributions: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper.*
- J50. **Abhishek Dubey**, Rajat Mehrotra, Sherif Abdelwahed, and Asser N. Tantawi. 2009. “[Performance modeling of distributed multi-tier enterprise systems](#)”. *SIGMETRICS Performance Evaluation Review*, 37, 2, 9–11
 - *Summary: This paper described the formalization of a queuing theoretic multi-tier model of cloud systems. This paper was later leveraged for the work on power management of computing clusters and autoscaling of cloud applications. The latter paper has been cited more than 600 times since it was published in 2011.*
 - *Contributions: 40 %. Devise and directed the main research ideas and wrote/edited a significant portion of the paper.*
- J51. **Abhishek Dubey**, Steven Nordstrom, Turker Keskinpala, Sandeep Neema[§], Ted Bapty[§], and Gabor Karsai[§]. 2007. “[Towards a verifiable real-time, autonomic, fault mitigation framework for large scale real-time systems](#)”. *Innovations in Systems and Software Engineering*, 3, 1, 33–52

- *Summary:* This paper described the real-time reflex engine and established parameters under which it will perform as expected and can scale to manage faults in large systems.
- *Contributions:* 40 %. *Devised and directed the main research ideas and wrote/edited a significant portion of the paper.* [**Impact Factor: 1.1.**]

2025

- HC1. Nathaniel S. Keplinger, Baiting Luo^{*}, Kyle Hollins Wray, Yunuo Zhang^{*}, Iliyas Bektas, Aron Laszka[§], **Abhishek Dubey**, and Ayan Mukhopadhyay[‡]. 2025. “[NS-Gym: A Comprehensive and Open-Source Simulation Framework for Non-Stationary Markov Decision Processes](#)”. In: *Advances in Neural Information Processing Systems (NeurIPS)* (Proceedings of Machine Learning Research). accepted
- *Summary:* This paper introduces NS-Gym, the first standardized simulation toolkit for non-stationary Markov decision processes (NS-MDPs). Built within the Gymnasium framework, it separates environment evolution from agent decision-making, enabling modular adaptations to dynamic settings. The toolkit provides standardized interfaces, benchmark problems, and reproducible evaluations. NS-Gym facilitates systematic research on decision-making under non-stationarity.
 - *Contributions:* 25 %. *Collaboratively developed the research ideas and wrote/edited a portion of the paper.* [**Acceptance Rate: 24.91 %.**]
- HC2. Yunuo Zhang^{*}, Baiting Luo^{*}, Ayan Mukhopadhyay[‡], Gábor Karsai[§], and **Abhishek Dubey**. 2025. “ESCORT: Efficient Stein-variational and Sliced Consistency-Optimized Temporal Belief Representation for POMDPs”. In: *Advances in Neural Information Processing Systems (NeurIPS)* (Proceedings of Machine Learning Research). accepted
- *Summary:* This paper presents ESCORT, a particle-based framework for accurate belief representation in POMDPs. ESCORT extends Stein Variational Gradient Descent with correlation-aware projections to model dependencies and temporal consistency constraints to stabilize updates. Unlike particle filters or fixed parametric methods, ESCORT adapts dynamically to complex, multi-modal distributions in high-dimensional spaces. Experiments demonstrate superior accuracy and decision quality over state-of-the-art methods across POMDP domains and synthetic benchmarks.
 - *Contributions:* 25 %. *Collaboratively developed the research ideas and wrote/edited a portion of the paper.* [**Acceptance Rate: 24.52 %.**]

In: *IEEE International Conference on Smart Computing, SMARTCOMP 2019, Washington, DC, USA*. (June 2019), 208–216 **[Best Paper Award]**
 - *Summary:* This was the first paper describing the LSTM models for estimating failures and predicting remaining useful life of hard disks.
 - *Contributions:* 40 %. *Devised and directed the main research ideas and wrote/edited a significant portion of the paper.* **[Acceptance Rate: 29 %.]**
- HC50. Michael Wilbur*, **Abhishek Dubey**, Bruno Leão, and Shameek Bhattacharjee[§]. June 2019. “[A Decentralized Approach for Real Time Anomaly Detection in Transportation Networks](#)”. In: *IEEE International Conference on Smart Computing, SMARTCOMP 2019, Washington, DC, USA*. (June 2019), 274–282
 - *Summary:* This paper described an innovative fast online procedure for detecting anomalies in traffic probe data collected for the cities.
 - *Contributions:* 40 %. *Devised and directed the main research ideas and wrote/edited a significant portion of the paper.* **[Acceptance Rate: 29 %.]**
- HC51. Chinmaya Samal*, **Abhishek Dubey**, and Lillian J. Ratliff. June 2019. “[Mobilytics-Gym: A Simulation Framework for Analyzing Urban Mobility Decision Strategies](#)”. In: *IEEE International Conference on Smart Computing, SMARTCOMP 2019, Washington, DC, USA*. (June 2019), 283–291
 - *Summary:* This paper described an extension of MATSIM for setting up transportation simulations considering the incentives and discrete choice models for the community members.
 - *Contributions:* 40 %. *Devised and directed the main research ideas and wrote/edited a significant portion of the paper.* **[Acceptance Rate: 29 %.]**
- HC52. Ayan Mukhopadhyay[‡], Geoffrey Pettet[†], Chinmaya Samal*, **Abhishek Dubey**, and Yevgeniy Vorobeychik[§]. 2019. “[An online decision-theoretic pipeline for responder dispatch](#)”. In: *Proceedings of the 10th ACM/IEEE International Conference on Cyber-Physical Systems, ICCPS 2019, Montreal, QC, Canada*, 185–196
 - *Summary:* This was a co-joint first author effort from Ayan and Geoff and demonstrated the first online MCTS based dispatch pipelines for managing emergency response in the cities.

- *Contributions: 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper. [Acceptance Rate: 23 %.]*
- HC53. Anastasia Mavridou, Aron Laszka[§], Emmanouela Stachtari, and **Abhishek Dubey**. 2019. “VeriSolid: Correct-by-Design Smart Contracts for Ethereum”. In: *Financial Cryptography and Data Security - 23rd International Conference, FC 2019, Frigate Bay, St. Kitts and Nevis, Revised Selected Papers*, 446–465
- *Summary: This paper described a framework and method to design smart contracts that are correct by design.*
 - *Contributions: 10%. Collaboratively developed the research ideas as a mentor to the team of students and edited a portion of the paper. [Acceptance Rate: 21.9 %.]*

2018 and Before

- HC54. Scott Eisele^{*}, Aron Laszka[§], Anastasia Mavridou, and **Abhishek Dubey**. 2018. “SolidWorx: A Resilient and Trustworthy Transactive Platform for Smart and Connected Communities”. In: *IEEE Conference on Internet of Things and Blockchains*, 1263–1272
- *Summary: This paper described the generalization of the transactive energy middleware and how it can be used for managing other resource allocation problems in the cities.*
 - *Contributions: 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper. [Acceptance Rate: 15.3 %.]*
- HC55. Ayan Mukhopadhyay[‡], Yevgeniy Vorobeychik[§], **Abhishek Dubey**, and Gautam Biswas. 2017. “Prioritized Allocation of Emergency Responders based on a Continuous-Time Incident Prediction Model”. In: *Proceedings of the 16th Conference on Autonomous Agents and MultiAgent Systems, AAMAS 2017, São Paulo, Brazil, May 8-12, 2017*, 168–177
- *Summary: This paper described a theoretical model for incident prediction and dispatch. This work was improved in subsequent ICCPS and AAMAS papers to use online Monte Carlo Tree Search for scalability.*
 - *Contributions: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper. [Acceptance Rate: 27 %.]*
- HC56. Aron Laszka[§], **Abhishek Dubey**, Michael Walker, and Douglas C. Schmidt[§]. 2017. “Providing privacy, safety, and security in IoT-based transactive energy systems using distributed ledgers”. In: *Proceedings of the Seventh International Conference on the Internet of Things, IOT 2017, Linz, Austria, October 22-25, 2017*, 13:1–13:8
- *Summary: This is a highly cited paper and established the theoretical protocols and analysis for designing transactive energy systems.*
 - *Contributions: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper. [Acceptance Rate: 31 %.]*
- HC57. Geoffrey Pettet[†], Saideep Nannapaneni[‡], Benjamin Stadnick, **Abhishek Dubey**, and Gautam Biswas. 2017. “Incident analysis and prediction using clustering and Bayesian network”. In: *2017 IEEE SmartWorld*, 1–8
- *Summary: This was one of the first papers from our team on incident analysis and prediction and used clustering and Bayesian methods followed by survival regression.*
 - *Contributions: 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper. [Acceptance Rate: 28 %.]*
- HC58. Akshay Dabholkar, **Abhishek Dubey**, Aniruddha S. Gokhale[§], Gabor Karsai[§], and Nagabhushan Mahadevan[§]. 2012. “Reliable Distributed Real-Time and Embedded Systems through Safe Middleware Adaptation”. In: *IEEE 31st Symposium on Reliable Distributed Systems, SRDS 2012, Irvine, CA, USA, October 8-11, 2012*, 362–371

- *Summary:* This paper described runtime adaption on ARINC-653 operating systems. The work was performed using the ARINC-653 emulator that I wrote earlier in the NASA software health management project.
 - *Contributions:* 40 %. *Devised and directed the main research ideas and wrote/edited a significant portion of the paper.* [Acceptance Rate: 25 %.]
- HC59. Nagabhushan Mahadevan[§], **Abhishek Dubey**, and Gabor Karsai[§]. 2011. “[Application of software health management techniques](#)”. In: *2011 ICSE Symposium on Software Engineering for Adaptive and Self-Managing Systems, SEAMS 2011, Waikiki, Honolulu , HI, USA, May 23-24, 2011*, 1–10
- *Summary:* This paper described the application of software health management that includes detection, diagnosis and recovery to the case study of Malaysian Air flight 124 over Perth, Australia in 2005. Our approach showed how the incident could have been avoided.
 - *Contributions:* 40 %. *Devised and directed the main research ideas and wrote/edited a significant portion of the paper.* [Acceptance Rate: 27 %.]
- HC60. Nilabja Roy, **Abhishek Dubey**, and Aniruddha S. Gokhale[§]. 2011. “[Efficient Autoscaling in the Cloud Using Predictive Models for Workload Forecasting](#)”. In: *IEEE International Conference on Cloud Computing, CLOUD 2011, Washington, DC, USA, 4-9 July, 2011*, 500–507
- *Summary:* This paper has been cited more than 600 times and was one of the earlier papers to conceptualize and describe algorithms for autoscaling.
 - *Contributions:* 25 %. *Collaboratively developed the research ideas and wrote/edited a portion of the paper.* [Acceptance Rate: 34 %.]
- HC61. Rajat Mehrotra, **Abhishek Dubey**, Sherif Abdelwahed, and Krisa W. Rowland. 2012. “[RFD-Mon: A Real-time and Fault-tolerant Distributed System Monitoring Approach](#)”. In: *The 8th International Conference on Autonomic and Autonomous Systems ICAS 2012*
- *Summary:* This paper described a real-time publish subscribe based performance monitoring middleware for large computing clusters.
 - *Contributions:* 40 %. *Devised and directed the main research ideas and wrote/edited a significant portion of the paper.* [Acceptance Rate: 23 %.]
- HC62. **Abhishek Dubey**, Nagabhushan Mahadevan[§], and Gabor Karsai[§]. 2012. “[A deliberative reasoner for model-based software health management](#)”. In: *The Eighth International Conference on Autonomic and Autonomous Systems*, 86–92 [Best paper award]
- *Summary:* This was the first paper where we introduced the Satisfiability Modulo Theory based reconfiguration of software assemblies in real-time systems to recover from failures.
 - *Contributions:* 40 %. *Devised and directed the main research ideas and wrote/edited a significant portion of the paper.* [Acceptance Rate: 23 %.]
- HC63. Jaiganesh Balasubramanian, Aniruddha S. Gokhale[§], **Abhishek Dubey**, Friedhelm Wolf, Chenyang Lu, Christopher D. Gill, and Douglas C. Schmidt[§]. 2010. “[Middleware for Resource-Aware Deployment and Configuration of Fault-Tolerant Real-time Systems](#)”. In: *16th IEEE Real-Time and Embedded Technology and Applications Symposium, RTAS 2010, Stockholm, Sweden, April 12-15, 2010*, 69–78
- *Summary:* This paper introduces DeCoRAM: a resource-efficient task-allocation algorithm for passively replicated DRE systems plus a strategizable allocation engine to meet real-time and fault-tolerance QoS. This paper also provides a middleware-agnostic configuration framework that auto-deploys components from those allocations, with testbed results showing predictable performance under multiple failures.

- *Contributions: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper. [Acceptance Rate: 22.1 %.]*

Book Chapters

- B1. “Artificial Intelligence for Smart Transportation”. *AI for Social Impact*
 - *Contributions: 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper.*
- B2. Ted Bapty[§], **Abhishek Dubey**, and Janos Sztipanovits[§]. 2020. “Cyber-Physical Vulnerability Analysis of IoT Applications Using Multi-Modeling”. In: *Modeling and Design of Secure Internet of Things*. John Wiley and Sons. Chap. 8, 161–184
 - *Contributions: 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper.*
- B3. Shreyas Ramakrishna*, Charles Hartsell*, **Abhishek Dubey**, Partha Pal, and Gabor Karsai[§]. 2020. “A Methodology for Automating Assurance Case Generation”. In: *Thirteenth International Tools and Methods of Competitive Engineering Symposium (TMCE 2020)*
 - *Contributions: 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper.*
- B4. “Chapter Seven - Consensus mechanisms and information security technologies”. *Advances in Computers*. Vol. 115. Oreilly, 181–209
 - *Contributions: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper.*
- B5. “Chapter Six - Testing at scale of IoT blockchain applications”. *Advances in Computers*. Vol. 115. Oreilly, 155–179
 - *Contributions: 25 %. Collaboratively developed the research ideas and wrote/edited a portion of the paper.*
- B6. ed. by Moamar Sayed-Mouchaweh. “Diagnosis in Cyber-Physical Systems with Fault Protection Assemblies”. *Diagnosability, Security and Safety of Hybrid Dynamic and Cyber-Physical Systems*. Springer International Publishing, Cham. Chap. Chapter 8, 201–225
 - *Contributions: 40 %. Devised and directed the main research ideas and wrote/edited a significant portion of the paper.*

Invited Talks

- P1. *From Lab to Real-World: The challenges of Decision Making Under Uncertainty for Societal Scale Cyber Physical Systems*. Seminar presented at John D. Tickle Engineering Building, 500 ISE UTK. Presenter: Associate Professor Abhishek Dubey. (2024)
- P2. “Towards Equitable Design and Operation of Public Transportation Systems”. In: *Bridging Learning and Algorithmic Fairness in the Operation of Urban Infrastructure and Network Systems (AFL) at CPS Week 2023*
- P3. “Optimus for Optimizing V2B system operation”. In: *Invited Presentation at Nissan*
- P4. “Decision Procedures for Optimizing Electrical Vehicles”. In: *Invited Presentation at Nissan*
- P5. “Building Resilient and Integrated Smart Transportation and Grid Solutions”. In: *Invited Presentation at Rivian (virtual)*
- P6. “Decision Procedures and Data Analysis at Scale for Smart Communities”. In: *Invited Presentation at Google Public Sector Forum*
- P7. “Building Resilient and Integrated Smart Transportation and Grid Solutions”. In: *Invited Presentation at UTK CURRENT Center(virtual)*
- P8. “Building Resilient and Integrated Smart Transportation and Grid Solutions”. In: *Invited Presentation at NSF workshop on Adaptive Transportation and Power Grid (virtual)*
- P9. “Optimizing Energy Cost of Public Transportation”. In: *Invited Presentation at National Renewable Energy Laboratory*
- P10. “AI-Engine for Optimizing Integrated Service in Mixed Fleet Transit Operations”. In: *Invited Presentation at Department of Energy Annual Merit Review*
- P11. “Addressing Transit Accessibility and Public Health Challenges due to COVID-19”. In: *Presentation and Poster at the NSF SCC PI Meeting*
- P12. “Challenges and Opportunities for Smart Transit Systems”. In: *Invited Presentation at Federal Transit Authority (virtual)*. (Apr. 2021)
- P13. “Mobility for All - Harnessing Emerging Transit Solutions for Underserved Communities”. In: *Presentation and Poster at the NSF SCC PI Meeting*. (Apr. 2021)

- P14. "Addressing Transit Accessibility and Public Health Challenges due to COVID-19". In: *Presentation and Poster at the NSF SCC PI Meeting*. (Apr. 2021)
- P15. "Anomaly Detection in Spatio Temporal Systems". In: *Invited Research Seminar at CISCO (Virtual)*. (Jan. 2021)
- P16. "Principled Approaches for Designing Resilient Decision Procedures in Smart and Connected Communities". In: *Invited Presentation at Information and Computer Sciences, UC Irvine*. (Mar. 2020)
- P17. "Building Principled Decision Procedures for Urban Transit and Emergency Response Services". In: *Invited Presentation at Berkley Institute of Transportation Studies*. (Jan. 2020)
- P18. "AI strategies for Urban Transportation and Electric Grid". In: *Invited Presentation at Pacific Northwest National Laboratory*. (Jan. 2020)
- P19. "Resilient Cyber Physical Systems". In: *Invited Presentation at Princeton Workshop on Resilience in Smart Grid*. (Oct. 2019)
- P20. "Principled Approaches for Resilient Emergency Response Procedures". In: *NSF Workshop with JST In Tokyo Japan*. (Dec. 2019)
- P21. "Principled Approaches for Resilient Decision Procedures in Smart and Connected communities". In: *Invited Presentation at George Mason University*
- P22. "Principled Approaches for Resilient Decision Procedures in Smart and Connected communities". In: *Adaptive Reflective Middleware Workshop Panel at Middleware Conference*. (Dec. 2019)
- P23. "Predictive Smart Emergency Response". In: *NSF Workshop on Emergency Response at University of South Carolina*
- P24. "Panel on AI in Smart Cities". In: *Metrolab Summit*
- P25. "Optimal Anomaly Detection and Dispatch Response in Transportation Networks". In: *Freedm Research Symposium at NCSU (Invited)*
- P26. "Internet of Things: Opportunities, Background and Challenges". In: *Tutorial and Presentation at Marriott International in Atlanta*. (May 2019)
- P27. "Model-based design for CPS with learning Enabled Components". In: *Invited Presentation at SMC-IT workshop on Autonomy*. (May 2019)
- P28. "Blockchains and CPS". in: *New Directions in Software and Technology (NDIST)*. (Dec. 2019)
- P29. "Resilient and Trustworthy Transactive Platform for Smart and Connected Communities". In: *Invited Talk at Nanyang Technological University, Singapore*. (May 2018)
- P30. "Resilient Analytics for Smart and Connected Communities". In: *Invited Presentation at Oakridge National Lab, Knoxville*. (Oct. 2018)
- P31. "Resilient Cyber Physical Systems". In: *Invited Presentation at Missouri Science and Technology*
- P32. "Blockchain and IoT". in: *Keynote at M4IoT workshop at Middleware Conference*
- P33. "Communication Anonymity in Transactive Energy". In: *Serial 2017 Workshop*. (Dec. 2017)
- P34. "Blockchains: Application to time-sensitive Systems". In: *Invited Presentation Hashed Health Summit, Nashville TN*
- P35. "Reliable Distributed Systems in Smart and Connected Communities". In: *Invited Presentation at Missouri Science and Technology*
- P36. "Drems-os: An operating system for managed distributed real-time embedded systems". In: *2017 6th International Conference on Space Mission Challenges for Information Technology (SMC-IT)*. IEEE
- P37. "Education and Immersion Opportunities in Smart Cities". In: *Education panel on Smart and connected communities*. (Nov. 2017)

- P38. "Social Routing Algorithms for Efficient Mobility". In: *US-Ignite Summit on Smart Cities*. (June 2017)
- P39. "Digitalization disrupts traditional business". In: *Keynote at M4IoT workshop at Middleware Conference*
- P40. "Resilient Information Architecture for Smart Systems". In: *Invited Talk at Siemens, CT, Munich*

Presentations Made in Person at Conferences

- P41. "An Online Approach to Solving Public Transit Stationing and Dispatch Problem". In: *Proceedings of the ACM/IEEE 15th International Conference on Cyber-Physical Systems (ICCPs)* (ICCPs '24). Best paper award. Association for Computing Machinery, Hong Kong, China
- P42. "Cyber-Physical Simulation Platform for Security Assessment of Transactive Energy Systems". In: *7th Workshop on Modeling and Simulation of Cyber-Physical Energy Systems, MSCPES@CPSIoTWeek 2019, Montreal, QC, Canada*
- P43. "Smart Transportation Delay and Resiliency Testbed Based on Information Flow of Things Middleware". In: *IEEE International Conference on Smart Computing, SMARTCOMP 2019, Washington, DC, USA, June 12-15, 2019*
- P44. "Mobilytics-Gym: A Simulation Framework for Analyzing Urban Mobility Decision Strategies". In: *IEEE International Conference on Smart Computing, SMARTCOMP 2019, Washington, DC, USA. (June 2019)*
- P45. "Towards an Adaptive Multi-Modal Traffic Analytics Framework at the Edge". In: *IEEE International Conference on Pervasive Computing and Communications Workshops, PerCom Workshops 2019, Kyoto, Japan, March 11-15, 2019*
- P46. "Towards demand-oriented flexible rerouting of public transit under uncertainty". In: *Fourth Workshop on International Science of Smart City Operations and Platforms Engineering, SCOPE@CPSIoTWeek 2019, Montreal, QC, Canada*
- P47. "Demo: Transactive Energy Application with RIAPS". in: *IEEE 22nd International Symposium on Real-Time Distributed Computing, ISORC 2019, Valencia, Spain, May 7-9, 2019*
- P48. "TRANSAX: A Blockchain-Based Decentralized Forward-Trading Energy Exchanged for Transactive Microgrids". In: *24th IEEE International Conference on Parallel and Distributed Systems, ICPADS 2018, Singapore, December 11-13, 2018*
- P49. "Role of Blockchains in Decentralized Cyber-Physical Systems". In: *Invited Talk at Siemens Blockchain Workshop, Erlangen, Germany*
- P50. "DxNAT - Deep neural networks for explaining non-recurring traffic congestion". In: *2017 IEEE International Conference on Big Data, BigData 2017, Boston, MA, USA, December 11-14, 2017*
- P51. "Incident analysis and prediction using clustering and Bayesian network". In: *2017 IEEE SmartWorld, San Francisco, CA, USA, August 4-8, 2017*
- P52. "Performance evaluation of smart systems under uncertainty". In: *2017 IEEE SmartWorld, San Francisco, CA, USA, August 4-8, 2017*
- P53. "Providing privacy, safety, and security in IoT-based transactive energy systems using distributed ledgers". In: *Seventh International Conference on the Internet of Things, IOT 2017, Linz, Austria, October 22-25, 2017*
- P54. "Transactive energy demo with RIAPS platform". In: *8th International Conference on Cyber-Physical Systems, ICCPS 2017, Pittsburgh, Pennsylvania, USA, April 18-20, 2017*

- P55. "A distributed and resilient platform for city-scale smart systems". In: *Conference presentation, IEEE/ACM Symposium on Edge Computing (SEC)*
- P56. "Towards Reliability-Based Decision Making in Cyber-Physical Systems". In: *2016 IEEE International Conference on Smart Computing, SMARTCOMP 2016, St Louis, MO, USA, May 18-20, 2016*
- P57. "The Role of Context and Resilient Middleware in Next Generation Smart Grids". In: *3rd Workshop on Middleware for Context-Aware Applications in the IoT, M4IoT@Middleware 2016, Trento, Italy*
- P58. "Smart City Hubs: Opportunities for Integrating and Studying Human CPS at Scale". In: *Workshop on Big Data Analytics in CPS: Enabling the Move from IoT to Real-Time Control*
- P59. "Challenges for Application Platforms for Integrated Cyber Physical Systems". In: *Workshop on Big Data Analytics in CPS: Enabling the Move from IoT to Real-Time Control*
- P60. "Transit Hub - An Extensible and Smart Decision Support System for Public Transportation". In: *CPS Principal Investigators Meeting*
- P61. "A Rapid Testing Framework for a Mobile Cloud". In: *25th IEEE International Symposium on Rapid System Prototyping, RSP 2014, New Delhi, India, October 16-17, 2014*
- P62. "An Information Architecture Platform for Mobile, Secure, and Resilient Distributed Systems". In: *High Confidence Software and Systems Conference*
- P63. "Using temporal causal models to isolate failures in Power System protection devices". In: *AUTOTESTCON*
- P64. "Temporal causal diagrams for diagnosing failures in cyber-physical systems". In
- P65. "A Resilient and Secure Software Platform and Architecture for Distributed Spacecraft". In: *SPIE Defense, Security, and Sensing*

Teaching Experience

- 2024F **Foundations of Hybrid and Embedded Systems** (CS 6376), Vanderbilt University
 - 14 graduate students
 - Introduced paper discussions and presentations alongside traditional theory and projects
- 2024S **Principles of Operating Systems** (CS 3281/5281), Vanderbilt University
 - 36 students
 - Stepped in to cover the course, replacing CS 4266 (Topics in Big Data)
 - Coordinated curriculum and assignments across three sections and three instructors
- 2023F **Foundations of Hybrid and Embedded Systems** (CS 6376), Vanderbilt University
 - 28 graduate students
 - Introduced new research-driven discussions in class
- 2023S **Topics in Big Data** (CS 4266/5266), Vanderbilt University
 - 33 undergraduate students and 10 graduate students
 - Enhanced hands-on data processing assignments with cloud computing tools
- 2022F **Foundations of Hybrid and Embedded Systems** (CS 6376), Vanderbilt University
 - 28 graduate students
 - Refined course focus on real-world hybrid system applications
- 2022S **Topics in Big Data** (CS 4266/5266), Vanderbilt University

- 38 students
- Incorporated machine learning techniques for large-scale datasets
- 2021S **Topics in Big Data** (CS 4266/5266), Vanderbilt University
 - 38 undergraduate and 5 graduate students
- 2020S **Topics in Big Data** (CS 4266/5266), Vanderbilt University
 - 47 students
 - Developed new content focused on distributed data processing
- 2020S **Data Science Applications for Smart Cities** (UNIV 3360/5360), Vanderbilt University
 - 21 students
- 2019F **Reliable Distributed Systems** (CS 3891/5891), Vanderbilt University
 - 10 students
- 2019S **Principles of Operating Systems** (CS 3281/5281), Vanderbilt University
 - 37 students
 - Transitioned the course to use Amazon Web Services for real-world OS experiments
- 2019 **Industrial Applications of Internet of Things**, Marriott
 - Developed an industrial course for Marriott in collaboration with Prof. Aniruddha Gokhale, focusing on cloud computing and IoT applications in the hotel industry
- 2018F **Reliable Distributed Systems** (CS 3891/5891), Vanderbilt University
 - 26 students
 - Created a special topic class on studying the reliability problem in distributed systems.
- 2018S **Principles of Operating Systems** (CS 3281/5281), Vanderbilt University
 - 35 students
- 2017F **Reliable Distributed Systems** (CS 3891/5891), Vanderbilt University
 - 11 students
- 2017S **Principles of Operating Systems** (CS 3281/5281), Vanderbilt University
 - 32 students
 - Introduced virtualization concepts into the curriculum
- 2016F **Principles of Operating Systems** (CS 3281/5281), Vanderbilt University
 - 42 students
- 2016S **Principles of Operating Systems** (CS 3281/5281), Vanderbilt University
 - 42 students
- 2015F **Principles of Operating Systems** (CS 3281/5281), Vanderbilt University
 - 49 students
- 2015S **Principles of Operating Systems** (CS 3281/5281), Vanderbilt University
 - 38 students
- 2014F **Principles of Operating Systems** (CS 3281/5281), Vanderbilt University
 - 40 students
- 2014S **Principles of Operating Systems** (CS 3281/5281), Vanderbilt University
 - 29 students
 - Revised and developed new curriculum for an introduction to operating systems

Students and Postdoc Scholars

PhD Students Graduated (6)

- 2023 Michael Wilbur. [Data-Driven Algorithms for Smart Transportation Systems](#) (Doctoral dissertation, Vanderbilt University).
- 2022 Ava Pettet. [Principled Algorithms for Real-time Sequential Decision Making for Large Scale Cyber-Physical Systems](#) (Doctoral dissertation, Vanderbilt University).
- 2022 Shreyas Ramakrishna. [Dynamic Safety Assurance of Autonomous Cyber-Physical Systems](#) (Doctoral dissertation, Vanderbilt University).
- 2020 Scott Eisele. [Resolving Challenges in Multi-Stakeholder CPS Using Distributed Ledgers](#) (Doctoral dissertation, Vanderbilt University).
- 2018 Fangzhou Sun. [Algorithms for Context-Sensitive Prediction, Optimization and Anomaly Detection in Urban Mobility](#) (Doctoral dissertation, Vanderbilt University) (Co-advised with Jules White).
- 2017 Pradhan, Subhav. [Algorithms and Techniques for Managing Extensibility in Cyber-Physical Systems](#) (Doctoral dissertation, Vanderbilt University) (Co-advised with Aniruddha Gokhale).

M.S. Students Graduated (3)

- 2020 Matthew Buruss. [Enhancing the Robustness of Deep Neural Networks Against Security Threats Using Radial Basis Functions](#) (MS Thesis, Vanderbilt University).
- 2020 Sanchita Basak. [Spatiotemporal Anomaly Detection and Prediction of Anomaly Propagation Path Using LSTM Networks](#) (MS Thesis, Vanderbilt University).
- 2019 Chinmaya Samal. [Time-dependent and Privacy- Preserving Decentralized Routing using Federated Learning](#) (MS Thesis, Vanderbilt University).

Current PhD Students - 10

- Sophie Pavia, CS PhD Program, funded by NSF and DOE
- Rishav Sen, EE PhD Program, funded by Nissan
- Yunuo Zhang, CS PhD Program, funded through DARPA
- Baiting Luo, CS PhD Program, funded through NSF
- Jacob Bucklew, CS PhD Program, funded through NSF and DOE
- Agrimma Khanna, CS PhD Program, funded through NSF
- Ammar Bin Zulqarnain, CS PhD Program, funded through NSF
- Samir Gupta, CS PhD Program, funded through NSF
- Vakul Nath, CS PhD Program, funded through TNGO
- Han Liu, CS PhD Program, Teaching Assistant

Thesis Advised (Committee Member)

- Nicholas Potteiger, CS PhD

- Chaoquan Cai, CS PhD
- Muhammad Nadeem, Civil Engineering, PhD
- Purboday Ghosh, EE PhD
- Christopher Kuhn – Technical University of Munich, Germany
- Samuel Karumba – The University of New South Wales, Australia
- Yu Hue
- Timothy Krentz
- Xingyu Zhou
- Avisek Naug
- Dimitrios Boursinos
- Afiya Ayman (University of Houston)
- Jian Li
- Ajay Chhokra
- Saqib Hasan, EE
- Anirban Bhattacharjee
- Yi Li
- Jian Lou
- Ayan Mukhopadhyay
- Amin Ghafouri
- Yao Pan
- Saideep Nannapaneni (Civil Engineering)

Current Postdoc Scholars and Research Scientists

- Fangqui Liu
- Jose Paolo Talusan
- Ajay Chokra, Research Scientist, Institute for Software Integrated Systems
- Ayan Mukhopadhyay, Senior Research Scientist, Institute for Software Integrated Systems

Past Postdoc Scholars Advised

- Ava Pettet
- Sayyed Vazirizade
- Saideep Nannapaneni
- William Emfinger

Undergraduate Researchers

- | | |
|------|--|
| 2024 | Ali,Syed, Al-Quran,Zakariyya, Sanya NeemaSmart transit systems |
| 2023 | Al-Quran,Zakariyya, Kevin Pan, Elena Chen, Ali,SyedSmart transit systems |

2022	Ammar Zulqarnain, Silvergold, Kevin Matthew, Al-Quran, Zakariyya Samer, Atluri, Megana Laxmi, David Gao and Immanneni, Vamsi Krishna, Bedant Lohani Smart transit systems
2020, 2021	Rongze Gui, CS - Transit Simulation Statistical Analysis and Visualization for Emergency Response Systems.
2020	Abhiram Vadali, CS - Big Data Analytics for Smart Transit Systems
2020	Riyan Kabir, CS - Big Data Analytics for Smart Transit Systems
2020	Hunter Wang, CS - Assured Autonomy
2020	Shriya Karam, CS - Big Data Analytics for Smart Transit Systems
2020	Teo Lee, CS - Predictive Models for Emergency Response Systems
2020	Anna Ouyang, Psychology - Predictive Models for Emergency Response Systems
2018, 2019	Matthew Buruss, CS - Assured Autonomy
2019, 2020	Keegan Campanelli, EE - Transactive Energy and Electric Grid
2019	Li Haoyu, CS - Data Analytics for Emergency Response
2019	Brian Xu, CS - Data Analytics for Emergency Response
2017, 2018	Rounak Salim, CS - Indoor Localization
2017	Hoyos Juan Sebastian, CS - Secure Operating Systems
2017	Nicholas Lewis, CS - Internet of Things
2017	Aaron Smith, CS - Virtual Reality
2017	Anne Zou, CS - Mobility Application for Cities
2016-2017	Smart Home Analytics Team - Megan Woodruff, John Carlton Jester, Morgan Fogel, Jian-peng Min (Senior Design)

Professional Societies

- Senior Member, IEEE
- Member, IEEE Power, and Energy Society
- Member, IEEE Intelligent Transportation Society
- IEEE Computer Society Special Technical Community on Blockchains
- IEEE Computer Society Special Technical Community on Smartgrid
- IEEE Computer Society Special Technical Community on Real-time Systems
- IEEE Technical Committee on Autonomous and Autonomic Systems.

Professional Service

2024-	Program Director, U.S. National Science Foundation Directorate for Computer and Information Science and Engineering, Cyber Physical Systems Cluster
2022-2024	Expert at U.S. National Science Foundation, Cyber Physical System Cluster.

Review Panels

2014-2020 Participated in grant review panels for the NSF Smart and Connected Community (SCC), Civic Innovation Challenge, IIS Core, Big Data, and Cyber-physical System Programs. In addition, reviewed for DOE and NASA programs.

Journal Editor

2024 Guest Editor: Special Issue for selected papers from ICCPS 2023
2019 Guest Editor: Special Issue of Journal of Systems and Software, ISORC 2018
2018 Guest Editor: Special Issue of Journal of Systems and Software, Elsevier on Adaptive Reflective Middleware
2013 Guest Editor: Special Issue on Software Health Management, Springer-Verlag
2016 International Workshop on Science of Smart City Operations and Platforms Engineering
2017 International Workshop on Science of Smart City Operations and Platforms Engineering

Conference and Workshop Organization

2025 Co-Organizer, Destion Workshop
2024 General Co-Chair, International Conference on Cyber-Physical Systems (ICCPS) 2024.
2025 Steering Committee Member, International Conference on Cyber-Physical Systems (ICCPS) 2025.
2023 General Co-Chair Smartcomp 2023.
2023 Program Co-Chair International Conference on Cyber-Physical Systems (ICCPS).
2023 Program Co-Chair International Conference on Assured Autonomy.
2022 Artifact Evaluation Chair International Conference on Cyber-Physical Systems (ICCPS).
2021,2022 Doctoral Symposium Chair Middleware.
2021 Tutorial Chair SmartComp 2021.
2021,2023 Workshop Program Chair DESTION 2021.
2021 Virtual Platforms Chair for CPSWeek 2021.
2020 Finance Chair of 22nd IEEE International Symposium On Real-Time Computing (ISORC)
2019 General Chair of 22nd IEEE International Symposium On Real-Time Computing (ISORC)
2019,2020 Program Co-chair of 4th IEEE Workshop on Big Data and IoT Security in Smart Computing at SmartComp conference.
2019 Organizer of challenges in Energy and Mobility Workshop at the Cyber-Physical Systems PI Meeting.
2020–2016 Chair - International Workshop on Science of Smart City Operations and Platforms Engineering at CPS Week
2018 Local organizer for Real-Time Systems and Symposium (RTSS)
2018 Program Chair of 21st IEEE International Symposium On Real-Time Computing (ISORC)
2018 Co-Chair - 1st International Workshop on Trustworthy and Real-Time Edge Computing for Cyber-Physical Systems (TREC4CPS)
2018 Program Chair of Smart and Connected Communities Workshop at International Conference on Distributed Computing and Networking.
2017 General Chair of the 16th Workshop on Adaptive and Reflective Middleware

2015 Chair, SPLC Conference, Tools and Demonstration Track

Technical Program Committees

- 2025 Program Committee, AAAI
- 2024 Program Committee Member, NeurIPS Data Benchmarks Track.
- 2024 Program Committee Member, AAAI XAI Workshop.
- 2024 Program Committee Member, International Conference on Cyber-Physical Systems (ICCPs).
- 2024 Program Committee Member, DESTION Workshop.
- 2023 International Conference on Assured Autonomy
- 2022–2023 Symposium on Software Engineering for Adaptive and Self-Managing Systems (SEAMS)
- 2021 IEEE International Conference on Cloud Engineering (IC2E)
- 2022 Thirty-Sixth AAAI Conference on Artificial Intelligence (AAAI-22)
- 2021–2023 DESTION - Design Automation for CPS and IoT
- 2021 DI-CPS - Data-Driven and Intelligent Cyber-Physical Systems
- 2021 IEEE International Conference on Blockchain and Cryptocurrency
- 2021 22nd ACM/IFIP International Conference for Middleware (Middleware 2021)
- 2021 Thirty-Fifth AAAI Conference on Artificial Intelligence (AAAI-21)
- 2020,2021 5th IEEE International Conference on Fog and Edge Computing 2021
- 2021 22nd International Conference on Distributed Computing and Networking (ICDCN 2021)
- 2020 1st Workshop on Blockchain for Network Resource Sharing (BlockNet 2020)
- 2020 7th International Workshop on Middleware and Applications for the Internet of Things (M4IoT 2020)
- 2020 COINS: IEEE International Conference on Omni-layer Intelligent systems
- 2020 IEEE Workshop on Assured Autonomy
- 2018,2019 Destion Workshop at CPS Week
- 2019 SmartComp
- 2017 Smart World Congress
- 2017 Fog World Congress
- 2016-2018 SmartSys Workshop at SmartComp Conference
- 2016-2018 ACM MMSys, special session on smart cities
- 2013-2020 Program committee member for International Symposium on Object-oriented Real-time Distributed Computing
- 2015 Program committee member for Workshop on Wild and Crazy Ideas on the interplay between IoT and Big Data
- 2015 Program committee member for 31st ACM/SIGAPP Symposium on Applied Computing, Reliable Software Technologies, and Communication Middleware Track
- 2012 Program Committee Member: 9th IEEE Workshop on Model-Based Development for Computer-Based Systems
- 2011 Co-Chair, Second International Workshop on Software Health Management
- 2011 Program committee member for 9th IEEE/IFIP International Conference on Embedded and Ubiquitous Computing

- 2011 Program committee member for International Symposium on Object-oriented Real-time Distributed Computing

Journal Review

- International Journal on Prognostics and Health Management
- IEEE Transactions on System Man and Cybernetics
- Future Generation Computer Systems
- IEEE Access
- IEEE Computer
- Elsevier Pervasive and Mobile Computing
- Innovations in System and Software
- IEEE Transactions on Smart Grid
- IEEE Transactions on Mobile Computing
- Journal on Cluster Computing
- ACM Transactions on Cyber Physical Systems
- Journal of Aerospace Computing, Information, and Communication
- Journal of Universal Computer Science
- IEEE Industrial Informatics
- Embedded System Letters
- Journal of Systems and Software - Elsevier

Departmental Service

- 2024 Judge, Electrical Engineering Student Competition.
- 2023–24 Director of Graduate Services MS. Started integration of Online forms with administrative processes such as dual BS/MS applications.
- 2023–24 Contributor, Department Website Transition.
- 2022–24 Web Chair for the computer Science department
- 2022– Mentoring Junior Faculty in the Department
- 2020 UPE Honors Society Faculty Advisor
- 2017-2021 Advisor to the computer science class of 2019, 2021, 2022 and 2023.

University Service

- 2025 Member, OVRP committee.
- 2025 Reviewer, Catalyst Innovation Challenge.
- 2024 Co-Leader, VSEC Research Group during Initial Charter Creation.
- 2024 Co-Leader, Energy Integration Group after VSEC Establishment.
- 2024 Member, Connected Computing College Committee.
- 2024 Reviewer, Catalyst Innovation Challenge.

- 2024 Reviewer, VUSRP.
- 2023– Research Co-Lead VSEC center
- 2023-2024 Research Committee Lead Vanderbilt Institute for Sustainability, Energy and Climate (VSEC)
- 2023 Reviewer, Catalyst Innovation Fund.
- 2023 Reviewer, Generative AI Proposals.
- 2023 Lead, Innovation Engine Proposal on Mobility; Contributor to Other Innovation Engine Discussions.
- 2023 Organizer, Research Symposium for Team-TN in Collaboration with OVPRI.
- 2016-2021 Supported and advised undergraduate researchers for the summer internship program
- 2020,2021 Faculty Search Committee Member for Civil and Environmental Engineering
- 2020 VU Summer Research Program Review Committee
- 2018,2020 Offered the university course on data science for smart communities
- 2019 Goldwater Scholarship Review Committee
- 2019 Participated in 2U curriculum discussion.
- 2019 My research group participated along with the W'ondry at the OZ art museum family day held on August 19th, 2019.
- 2018,2019 Served in various MOVE-VU committees
- 2018 Organized Multimodal Mobility Workshop for interaction between community, industry, and academic partners. Details are available at <https://cps-vo.org/group/MultiModalMobility>
- 2018 Served in the Working Group on Energy and Natural Resources led by Prof. George Hornberger.
- 2017,2018 Presented review of smart community research at Intro to Engineering Lectures
- 2017,2018 Presented research talks during visits of Oakridge and ORAU researchers
- 2017 Participated in the mobility planning group in future VU to design a campus wayfinding system.
- 2017 Data Analytics for the Vanderbilt CMAQ Grant.
- 2017 Served as a member of the Bluesky Advisory Committee
- 2017 Served in the transit committee of Future VU
- 2017,2018 Presented Transit Related Projects at FutureVU meetings
- 2017 Presented review of smart community research at Intro to Engineering Lectures (2017)
- 2016 Directed undergraduate senior design project on smart home analytic.

Community Service

- 2024 Actively engaged in Nashville Innovation Alliance.
- 2024 Established bi-weekly calls with Metro Nashville and Metro ITS for technical collaboration.
- 2024 Collaborating with Nashville Fire Department on resource management.
- 2024 Working with Williamson County on school bus optimization.
- 2024 Assisting Knoxville, Chattanooga, Memphis, and Nashville in optimizing bus services.
- 2022–2023 Organized the Vanderbilt and connected Nashville ecosystem workshop and subsequent breakout groups.

- 2017-2021 Led collaboration with the Tennessee Department of Transportation for analyzing accidents and improving safety on roads.
- 2019-2021 Led collaboration with Metro Nashville for data management and data analytics of Scooter and accident data.
- 2020-2021 Led collaboration with Nashville WeGo and Chattanooga CARTA for managing service loads during the pandemic.
 - 2019 My research group participated along with the W'ondry at the OZ art museum family day held on August 19th, 2019.
 - 2018 Organized [Multimodal Mobility Workshop](#) for interaction between community, industry, and academic partners.
 - 2018 Led the Air Quality Assessment Project in collaboration with the Greater Nashville Regional Council (GNRC).
- 2017-2018 Led the Gulch Traffic Density Assessment Project in collaboration with Planning Department.
- 2017-2018 Led collaboration with the Nashville Mayor's office and the Nashville Technology Council on Blockchain initiatives in the metropolitan area.
 - 2017 Led collaboration with the Open Data initiative at the Metro Information Technology Services (ITS).
- 2015-2017 Led Nashville projects at the Global Cities Team Challenge organized by the National Institute of Standards and Technology (NIST). The projects included collaborative work with Nashville Metropolitan Transit Authority (MTA) and Nashville Fire Department.
 - 2018 Participated in the TennSmart program.
 - 2018 Study of the Transit Hub platform for Chattanooga Area Regional Transit Authority.
- 2016-2017 Chair of Connected Nashville Technology Standards Committee convened by Mayor.
 - 2016 Helped develop the Nashville application for the Department of Transportation Challenge.
